

Gold from special regions

Gold, as discovered in Alaska in the 19th century or in the Andes in the 16th century, can still be found there today.

In 1896, gold was discovered in a tributary of the Klondike River, which ran through Alaska and the Yukon Territory. This triggered a huge gold rush. The Klondike Gold Rush came to an end in 1899 when gold was discovered in Nome, Alaska. Today, gold mining is an important economic sector in Alaska. Gold has been and still is found throughout Alaska. According to the Fraser Institute's ranking, Alaska is one of the top mining-friendly jurisdictions in the world. The enormous increase in the price of gold also makes new and old gold mines in Alaska more attractive. The avoidance of serious consequences for the environment and the indigenous peoples is now taken into account differently than in the past.

For example, from **U.S. GoldMining** - <https://www.commodity-tv.com/ondemand/companies/profil/us-goldmining-inc/> -. The company owns the extremely promising Whistler project, which contains gold and copper. Environmental sustainability and social responsibility are an important aspect of U.S. GoldMining. The drilling results show high-grade gold and silver values as well as very good values for base metals.

Another exciting region is the Andes, the longest mountain range on earth. The Incas established their great empire there in the Andes in the 13th century. It encompassed Peru and parts of Ecuador, central Bolivia, Argentina, Chile and Colombia. Today, the government promotes the mining industry. Gold was first discovered there in Ecuador

in the 16th century. The potential for gold, silver, copper and molybdenum in Ecuador is likely to be huge.

One company that is focusing on gold and copper at its The Lost Cities Cutucu project in the Andes is **Aurania Resources** - <https://www.commodity-tv.com/ondemand/companies/profil/aurania-resources-ltd/> -. The project combines historical work and modern exploration methods in an exciting way.

Current corporate information and press releases from Aurania Resources (- <https://www.resource-capital.ch/en/companies/aurania-resources-ltd/> -) and U.S. GoldMining (- <https://www.resource-capital.ch/en/companies/us-goldmining-inc/> -).
